### **Forward-looking Statements**

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent beliefs regarding future events. By their nature, forward-looking statements are based on assumptions and are subject to inherent risks and uncertainties. There is significant risk that forward-looking statements will not prove to be accurate. Readers of this document should not place undue reliance on forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the expectations, estimates or intentions expressed or implied in the forward-looking statements. These factors include but are not limited to market and general economic conditions, interest rates, foreign currency exchange rates, the extent of industry sector exposure, the performance of the securities of the issuers held in the portfolio and regulatory developments and the risks detailed in the First Trust ETF's prospectus. The Manager does not undertake and specifically disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

## Management Report of Fund Performance

### For the six-month period ended June 30, 2020

---

#### **Investment Objective and Strategy**

The fundamental investment objective of **First Trust AlphaDEX™ Emerging Market Dividend ETF (CAD-Hedged)** (the “First Trust ETF”) is to provide unitholders with exposure to the performance of a portfolio of dividend paying equity securities domiciled in the emerging markets and selected from the countries represented in the S&P BMI Emerging Markets Index as well as providing unitholders with monthly distributions.

To achieve its investment objectives, the First Trust ETF will primarily invest in common shares, GDRs, ADRs or other depository receipts listed on a major U.S. or Canadian stock exchange, of dividend paying companies in emerging countries as defined by the S&P Emerging Markets BMI Index. Securities will also be subject to an initial screening process to ensure sufficient liquidity (minimum three month average daily trading volume of \$2.5 million), market capitalization (minimum of \$1 billion) and price per security (minimum of \$2). Eligible companies will then be assigned a score and ranked based on the AlphaDEX™ selection methodology which is a rules based methodology that analyzes companies based on five growth factors consisting of three, six and twelve month price appreciation, one year sales growth and sales-price ratio and three value factors consisting of book value-to-price ratio, cash flow-to-price ratio and return on assets. The top 75% of the eligible companies, based on selection score, will comprise the portfolio. The resulting stocks are not weighted based on market capitalization, but on the basis of potential investment merit. The selected stocks are then divided equally into quintiles based on their AlphaDEX™ methodology scores; the higher scoring quintiles are given a greater weight than lower scoring quintiles. The top ranked quintile receives a top weight of 5/15 (33.3%) of the portfolio with successive quintiles receiving 4/15 (26.7%), 3/15 (20.0%), 2/15 (13.3%) and 1/15 (6.7%). The First Trust ETF will generally seek to hedge substantially any of its U.S. dollar currency exposure back to the Canadian dollar.

The First Trust ETF will rebalance and reconstitute the portfolio of constituent securities semi-annually. Between rebalancing dates, the allocation between each of the constituent securities will change due to market movement and the portfolio advisor will typically not reallocate, include or exclude issuers from the First Trust ETF portfolio until its next rebalance date.

#### **Risk**

The AlphaDEX™ stock selection process is a rules-based process and can result in sector weightings that differ from that of the benchmark. The ability of the underlying securities to pay a dividend in the future is dependent on factors that are not controlled by fund management. A security held in the First Trust ETF may, at any time, decide to cut or eliminate its dividend payment. Given the First Trust ETF employs a currency hedging strategy to minimize the impact of changes in the USD-CAD exchange rate and considering that the portfolio remains consistent in its application of the AlphaDEX™ stock selection methodology to pick stocks for the portfolio, we conclude there was no material change to the risk profile of the First Trust ETF. Investors should refer to the most recent prospectus as it contains detailed discussion of risk relating to the investment of the First Trust ETF.

#### **Results of Operations**

##### ***General***

The First Trust ETF's total net asset value as of June 30, 2020 was \$4,734,355 or \$11.83 per Common Class unit (“FDE”) and \$11.78 per Advisor Class unit (“FDE.A”). The First Trust ETF's total net asset value as of December 31, 2019 was \$4,203,406 or \$16.84 per FDE and \$16.77 per FDE.A.

For the six-month period ended June 30, 2020, the First Trust ETF paid total cash distributions per unit of \$0.2350 for FDE and \$0.1750 for FDE.A. In addition, the First Trust ETF declared cash distributions per unit of \$0.0300 for FDE and \$0.0200 for FDE.A for record date of June 30, 2020 with payment date of July 8, 2020.

##### ***Investment Performance***

For the six-month period ended June 30, 2020, FDE returned -28.43% and FDE.A returned -28.81% compared to MSCI Emerging Market Index (USD) (the “benchmark”) return of -9.67%. Unlike the benchmark, the First Trust ETF's returns are net of fees and expenses.

## Management Report of Fund Performance

### For the six-month period ended June 30, 2020

---

The First Trust ETF underperformed the benchmark. Selection in South American stocks from Chile, Mexico, and Brazil relative to the benchmark detracted from performance. The First Trust ETF also underperformed due to poor selection in the Industrials, Communication Services, and Utilities sectors. The First Trust ETF's underperformance can also be attributed to the First Trust ETF's emphasis on dividend yield, one of the worst performing factors during the period, second only to value.

The top five stocks by contribution to return were Gold Fields Limited Sponsored ADR, ZTO Express (Cayman) Inc. Sponsored ADR Class A, Dr. Reddy's Laboratories Ltd. Sponsored ADR, AngloGold Ashanti Limited Sponsored ADR, and Mobile TeleSystems PJSC Sponsored ADR. The bottom five stocks by contribution to return were ICICI Bank Limited Sponsored ADR, TIM Participacoes S.A. Sponsored ADR, Companhia Energetica de Minas Gerais SA Sponsored ADR Pfd, Star Bulk Carriers Corp., and LATAM Airlines Group SA Sponsored ADR.

The portfolio held 41 equity securities at the end of the reporting period. The top ten equity holdings accounted for 40.57% of the portfolio. Utilities, Industrials, and Energy were the top three sector weightings at the beginning of the reporting period. At the end of the period, Communication Services, Materials, and Information Technology were the top three sector weightings. During the period, the First Trust ETF added 11 positions and removed 12 positions. The changes were made by applying the quantitative AlphaDEX™ selection methodology to a universe of emerging market dividend paying stocks.

During the period, appreciation in the U.S. dollar versus the Canadian dollar was detrimental for the First Trust ETF given the currency hedge.

### **Recent Developments**

Over the reporting period, emerging market equities underperformed their developed market peers. We believe the underperformance is largely due to a strengthening U.S. dollar during the period, which makes it more difficult for debt-burdened emerging market countries to pay back debt denominated in U.S. dollars. Moreover, investors fear that the developing trade war between the United States and China could slow global growth, lowering demand for raw materials and hurting emerging market economies that are commodity exporters. Beyond the underlying growth and trade concerns, uncertainty about the fallout of the global economic shutdown due to the COVID-19 has exacerbated the gap between developed and emerging economies. Brazil, Mexico, and Peru have been hit particularly hard by the virus. Compared to European nations with a high initial case count, the South American countries have yet to see a deceleration in case growth through the beginning of the second half of the year.

(2) Net asset value and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the period/year.

(3) Distributions were paid in cash or reinvested in additional units of the First Trust ETF, or both. Non-cash distributions are reinvested in additional units of the First Trust ETF and subsequently consolidated. Neither the number of units held by the unitholder, nor the net asset per unit of the First Trust ETF change as a result of any non-cash distributions.

(4) This table is not intended to be a reconciliation of beginning to ending net asset value per unit.

(1) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated year and is expressed as an annualized percentage of daily average net asset value during the period/year.

(2) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period/year.

(3) The First Trust ETF's portfolio turnover rate indicates how actively the First Trust ETF's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the First Trust ETF buying and selling all of the securities in its portfolio once in the course of the period/year. The higher a First Trust ETF's portfolio turnover rate in a year, the greater the trading cost payable by the First Trust ETF in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between high turnover rate and the performance of a First Trust ETF.

**Management Fees**

The First Trust ETF will pay the Manager a management fee of 0.65% and, in respect of the FDE.A, an additional amount for a service fee (see "FDE.A Service Fee" below) based on the average daily NAV of the First Trust ETF. The management fee, plus applicable taxes including HST, will be accrued daily and paid monthly in arrears. The Manager may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.

**FDE.A Service Fee**

The Manager pays registered dealers a service fee equal to 1.00% per annum of the NAV of the Units held by clients of the registered dealer, plus any applicable taxes. The service fee will be calculated and accrued daily and paid quarterly at the end of each calendar quarter.
