Investment Objective

First Trust Short Duration High Yield Bond ETF (CAD-Hedged) seeks to provide Unitholders with a high level of current income by investing primarily in a diversified portfolio of below investment grade debt securities as rated by Moody's Investor Services, Inc., and Standard & Poors (Ba1/BB+ or below) or a similar rating by a designated rating organization (as such defined in National Instrument 81-102). As a secondary objective, the fund will seek capital appreciation.

Key Features

- Primarily invests in high yield issuers in the U.S., targeting a high level of interest income and the potential for capital appreciation
- Actively managed portfolio with a diversified portfolio of high yield bonds, floating rate loans and other debt securities
- Portfolio managers for the fund have proven experience and expertise at managing the challenges and opportunities in high yield bond investments
- Monthly income stream

Risk rating

First Trust Portfolios Canada has rated the volatility of this ETF as **low to medium**. This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the Risk section of the ETF's prospectus.

Annualized Performance*	1-month	3-month	6-month	YTD	1-year	3-year	5-year	10-year	Since Inception

* The indicated rates of return are the historical annual compounded total returns, including changes in unit value and do not take into account sales, redemption or optional charges or income taxes payable by a security holder that would have reduced returns. The Fund was originally launched as a TSX-listed closed-end fund on May 20, 2011, and converted into an exchange traded fund on January 25, 2016 (the "Conversion Date"). Performance shown here prior to the Conversion Date is that of First Trust Short Duration High Yield Bond Fund ("FH") since its inception date, which is relevant to this Fund as it adopted the investment objectives and strategies of FH as of the Conversion Date.

³As of December 31, 2017 audited annual financial statements and MRFP.

⁴The weighted average effective duration is a measure of the bond portfolio's price sensitivity to changes in interest rates. Bond portfolios with longer durations are more sensitive to changes in interest rates than securities of shorter durations.

⁵Weighted Average Price is calculated based on the price of the assets excluding ETFs.

⁶Distribution rate is calculated by dividing the most recent annualized distribution paid or declared by the Net Asset Value. Distribution rates may vary. The distributed amount may include return of capital (ROC) from time to time.

⁷The ratings are by Standard & Poor's except where otherwise indicated. A credit rating is an assessment provided by a nationally recognized statistical rating organization (NRSRO) of the creditworthiness of an issuer with respect to debt obligations except for those debt obligations that are only privately rated. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest). Investment grade is defined as those issuers that have a long-term credit rating of BBB- or higher. "NR" indicates no rating. The credit ratings shown relate to the credit worthiness of the issuers of the underlying securities in the Fund, and not to the Fund or its shares. Credit ratings are subject to change.

Commissions, trailing commissions, management fees and expenses all may be associated with fund investments. Please read the prospectus before investing. The indicated rates of return are the historical annual compound total returns including changes in the unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by the unitholder that would have reduced returns. Funds are not guaranteed, their values change frequently and past performance may not be repeated.
