Investment Objective

The First Trust AlphaDEX™ U.S. Technology Sector Index ETF seeks to replicate, to the extent possible, the performance of the StrataQuant® Technology Index (the "Index"), net of expenses. The investment strategy of the First Trust ETF is to invest in and hold the constituent securities of the Index in the same proportion as they are reflected in the Index or securities intended to replicate the performance of the Index. The Index employs the AlphaDEX™ stock selection methodology to select stocks from the Russell 1000® Index that are within the technology sector. The Russell 1000® Index is a market index representing the large- and mid-capitalization segment of the U. S. equity universe.

Key Features

- Full transparency
- Intraday liquidity
- Diversification
- May reduce U.S. estate tax obligations and T1135 requirements

Risk rating

First Trust Portfolios Canada has rated the volatility of this ETF as **high**. This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the Risk section of the ETF's prospectus.

Annualized Performance	1-month	3-month	6-month	YTD	1-year	3-year	5-year	10-year	Since Inception

¹ FT Portfolios Canada Co. uses a harmonic weighted average method for calculating the price ratios for an investment portfolio except for Return on Equity which uses weighted arithmetic mean. The harmonic weighted average method measures the valuation of the portfolio as a whole, for example, the total "price" of the portfolio to the total earnings purchased. For example, for P/E, it is the ratio of the portfolio's total market value in equities to its share of the underlying stocks' earnings. This method evaluates the entire portfolio like a single stock and it minimizes the impact of outliers.

² Canadian securities law does not allow for the display of performance data less than one year.

First Trust AlphaDEX™ U.S. Technology Sector Index ETF (Hedged Units)

AlphaDEX™ U.S. Technology Sector Index Methodology

The indexes which provide the basis for the AlphaDEX™ exchange-traded funds start with a broad-based index and are enhanced through the use of the proprietary AlphaDEX™ stock selection methodology. This methodology is designed to use value and growth factors to select and weight stocks based on their investment merit. The methodology used to select the stocks for the indexes is described in the chart below.

About First Trust

The First Trust companies are a well-respected global enterprise with a history in the U.S. market since 1991 and in Canada since 1996. First Trust Advisors L.P., the portfolio advisor for the First Trust AlphaDEX™ ETFs, has US \$118.95 billion in assets as of December 31, 2017 under supervision or management.

Commissions, trailing commissions, management fees and expenses all may be associated with fund investments. Please read the prospectus before investing. The indicated rates of return are the historical annual compound total returns including changes in the unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by the unitholder that would have reduced returns. Funds are not guaranteed, their values change frequently and past performance may not be repeated.
