## **INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE**

### **June 30, 2023**

#### **First Trust AlphaDEX™ U.S. Health Care Sector Index ETF (the “First Trust ETF”)**

This interim management report of fund performance contains financial highlights but does not contain the complete unaudited interim financial statements of the First Trust ETF. All references to dollars contained herein are to Canadian dollars.

Securityholders may also contact us to request a copy of the First Trust ETF's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosures relating to the First Trust ETF by calling 1-877-622-5552, by writing to us at FT Portfolios Canada Co., 40 King Street West, Suite 5102, Scotia Plaza, Box 312, Toronto, Ontario M5H 3Y2 or by visiting our website at [www.firsttrust.ca](http://www.firsttrust.ca) or SEDAR at [www.sedar.com](http://www.sedar.com).

#### **Forward-looking Statements**

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent beliefs regarding future events. By their nature, forward-looking statements are based on assumptions and are subject to inherent risks and uncertainties. There is significant risk that forward-looking statements will not prove to be accurate. Readers of this document should not place undue reliance on forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the expectations, estimates or intentions expressed or implied in the forward-looking statements. These factors include but are not limited to market and general economic conditions, interest rates, foreign currency exchange rates, the extent of industry sector exposure, the performance of the securities of the issuers held in the portfolio and regulatory developments and the risks detailed in the First Trust ETF's prospectus. The Manager does not undertake and specifically disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

#### **Investment Objective and Strategy**

The fundamental investment objective of **First Trust AlphaDEX™ U.S. Health Care Sector Index ETF** (the “First Trust ETF”) is to replicate, to the extent possible, the performance of the StrataQuant® Health Care Index (“Index”), net of expenses.

The investment strategy of the First Trust ETF is to invest in and hold the constituent securities of the Index in the same proportion as they are reflected in the Index or securities intended to replicate the performance of such Index. The Index results from applying the AlphaDEX™ methodology to the Russell 1000® Index, a market index representing the large and mid-capitalization segment of the U.S. equity universe, and then selecting the constituent securities for the Index from those qualifying stocks included in the Health Care Sector.

The Manager may use a sampling methodology in selecting investments for the First Trust ETF. As an alternative or in conjunction with investing in and holding constituent securities, the First Trust ETF may also invest in other securities to obtain exposure to the constituent securities of the applicable Index in a manner that is consistent with the investment objective and investment strategy of the First Trust ETF.

In this case, the First Trust ETF may also obtain exposure to the applicable Index by holding securities of a US-listed index ETF, First Trust Health Care AlphaDEX® Fund (NYSE Arca ticker: FXH), of an affiliate of the Manager, which replicates or substantially replicates the applicable Index.

#### **Risk**

The risks associated with an investment in the First Trust ETF remain as discussed in the First Trust ETF’s most recent prospectus. There have been no significant changes during the reporting period that affected the overall level of risk associated with the First Trust ETF. The First Trust ETF provides exposure to the Health Care sector of the U.S. equity market in either a non-U.S. currency hedged and U.S. currency hedged manner.

#### **Results of Operations**

##### **General**

The First Trust ETF’s total net asset value as of June 30, 2023 was \$14,532,230 or \$38.64 per Unit (“FHH”) and \$29.39 per Hedged Unit (“FHH.F”). The First Trust ETF’s total net asset value as of December 31, 2022 was \$17,373,006 or \$39.74 per Unit (“FHH”) and \$29.75 per Hedged Unit (“FHH.F”).

For the six-month period ended June 30, 2023, the First Trust ETF paid total cash distributions per unit of \$0.0500 for FHH and \$0.0250 for FHH.F.

##### **Investment Performance**

For the six-month period ended June 30, 2023, FHH returned -2.76% compared to the Russell 1000® Health Care Index (CAD) (the “benchmark”) total return of -2.92% while FHH.F returned -1.22% compared to the Russell 1000® Health Care Index (USD) (the “hedged benchmark”) total return of -0.60%. Unlike the benchmark and the hedged benchmark, the First Trust ETF’s returns are net of fees and expenses.

As of June 30, 2023, the Health Care sector accounted for 12.73% of the weight of the Russell 1000® Index. The benchmark underperformed the Russell 1000® Index (CAD) which returned 13.95%. The hedged benchmark underperformed the Russell 1000® Index (USD) which returned 16.68%.

As of June 30, 2023, the portfolio held 82 equity securities. The top ten equity holdings accounted for 23.46% of the total NAV. The AlphaDEX™ stock selection process is a rules-based process and can result in industry weightings that differ from that of the benchmark and the hedged benchmark.

FHH slightly outperformed the benchmark during the period due to stock selection within the Health Care Providers sector. Stock selection within Medical Equipment and Services partially offset the outperformance.

## Management Report of Fund Performance

### For the six-month period ended June 30, 2023

---

The U.S. dollar depreciated 2.22% against the Canadian dollar from December 31, 2022, to June 30, 2023. FHH.F hedges its exposure to the U.S. dollar.

The top five stocks by contribution to return were Exact Sciences Corporation, Penumbra, Inc., Tenet Healthcare Corporation, Sotera Health Company, and HCA Healthcare, Inc. The bottom five stocks by contribution to return were Moderna, Inc., Agilon Health, Inc., Pfizer Inc., United Therapeutics Corporation, and Alnylam Pharmaceuticals, Inc.

#### **Recent Developments**

The Russell 1000® Index rebounded in the first half of 2023, gaining 16.68%, including dividends. The U.S. dollar depreciated relative to the Canadian dollar, meaning the index gained 13.95% over the same period measured in Canadian dollars. However, the gains were concentrated in a few mega-cap companies from the Information Technology, Communication Services, and Consumer Discretionary sectors that rebounded from last year's losses as 2022's bearish sentiment subsided. These three sectors were the best-performing sectors in the first half of 2023. Consumer Discretionary stocks, in particular, benefitted from announcing better-than-expected earnings during the period. Energy, Utilities, and Health Care were the three worst-performing sectors. Utilities stocks as a group missed earnings expectations during the period. Inflation continued to taper off during the period, reaching its lowest level since early 2021 of 3.00% by June, largely driven by decreased energy prices. The U.S. Federal Reserve paused its rate-hike campaign at its June meeting but signaled that further interest rate hikes would be needed to bring down inflation. With the process of bringing inflation down to the Fed's 2.00% target playing out more slowly than expected, the market mostly abandoned its expectation of rate cuts later this year, a significant development in the first half of 2023. Despite the Fed's aggressive interest rate hikes, the U.S. economy so far has avoided a much-anticipated recession. The economy expanded in the first quarter, albeit slower than in 2022's fourth quarter. Overall, the U.S. 10-year Treasury yield decreased slightly from 3.87% at the start of the period to 3.84% at the end of the period, while shorter-term rates increased significantly. Overall, the Russell 1000® Index finished the first half trading at a 20.1 P/E multiple with a 1.53% dividend yield, more expensive than 17.4 and 1.74%, respectively, at the end of 2022.

(1) This information is provided as at June 30, 2023 and December 31 of the period/years shown and is prepared under IFRS.

(2) Net asset value and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the period/year.

(3) Distributions were paid in cash or reinvested in additional units of the First Trust ETF, or both. Non-cash distributions are reinvested in additional units of the First Trust ETF and subsequently consolidated. Neither the number of units held by the unitholder, nor the net asset per unit of the First Trust ETF change as a result of any non-cash distributions.

(4) This table is not intended to be a reconciliation of beginning to ending net asset value per unit.

(1) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period/year and is expressed as an annualized percentage of daily average net asset value during the period/year.

(2) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period/year.

(3) The First Trust ETF's portfolio turnover rate indicates how actively the First Trust ETF's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the First Trust ETF buying and selling all of the securities in its portfolio once in the course of the period/year. The higher a First Trust ETF's portfolio turnover rate in a period/year, the greater the trading cost payable by the First Trust ETF in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between high turnover rate and the performance of a First Trust ETF.

**Management Fees**

The First Trust ETF will pay the Manager a management fee of 0.70% based on the average daily NAV of the First Trust ETF. The management fee, plus applicable taxes including HST, will be accrued daily and paid monthly in arrears. The Manager may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.
