Risk rating

First Trust Portfolios Canada has rated the volatility of this ETF as **high**. This rating is based on how much the Underlying Fund returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the Risk Factors section of the ETF's prospectus.

Effective February 17, 2021, the First Trust ETF changed its investment objectives to seek to replicate, to the extent possible, the performance of an index of U.S. listed companies designed to track the performance of clean energy companies engaged in manufacturing, development, distribution and installation of clean-energy technologies including, but not limited to, solar photovoltaics, wind power, advanced batteries, fuel cells, and electric vehicles, initially the NASDAQ® Clean Edge® Green Energy IndexSM. The First Trust ETF provides exposure to its new index by investing all or substantially all of its assets in an underlying U.S. index fund known as First Trust NASDAQ® Clean Edge® Green Energy Index Fund which is managed by the First Trust ETF's portfolio advisor. If this change had been effective throughout the performance measurement period the performance of the First Trust ETF should have more closely replicated performance of the index.

¹ As of December 31, 2025 audited annual financial statements and MRFP.

² Distribution rate is calculated by dividing the most recent annualized distribution paid or declared by the Net Asset Value. Distribution rates may vary. The distributed amount may include return of capital (ROC) from time to time.

*The First Trust ETF's management fee will also bear the management fee of the underlying fund (i.e. First Trust NASDAQ® Clean Edge® Green Energy Index Fund).

First Trust NASDAQ® Clean Edge® Green Energy ETF

The First Trust ETF will obtain exposure to the Index by investing in the Underlying Fund, a US-listed index ETF which itself replicates or substantially replicates the Index.

The index is a modified market capitalization weighted index designed to track the performance of clean energy companies that are publicly traded in the United States and includes companies engaged in manufacturing, development, distribution and installation of emerging clean-energy technologies including, but not limited to, solar photovoltaics, wind power, advanced batteries, fuel cells, and electric vehicles.

The NASDAQ® Clean Edge® Green Energy IndexSM is a modified market cap weighted index in which larger companies receive a larger index weighting. The index weighting methodology includes caps to prevent high concentrations among larger alternative energy stocks.

The index is reconstituted twice a year in March and September and rebalanced quarterly.
