

Effective February 17, 2021, the First Trust ETF changed its investment objectives to replicate, to the extent possible, the performance of an index of U.S. companies involved in the internet industry, initially the Dow Jones Internet Composite IndexSM. In connection with the change of investment objectives, the name of the First Trust ETF changed to First Trust Dow Jones Internet ETF and offer both units and hedged units to the U.S. dollar. The First Trust ETF provides exposure to its new index by investing all or substantially all of its assets in an underlying U.S. index fund known as First Trust Dow Jones Internet Index Fund, which is managed by the First Trust ETF's portfolio advisor.

Investment Objective

First Trust Dow Jones Internet ETF (the "First Trust ETF") seeks to replicate, to the extent possible, the performance of an index of U.S. companies involved in the internet industry, initially the Dow Jones Internet Composite IndexSM. The First Trust ETF provides exposure to its new index by investing all or substantially all of its assets in an underlying U.S. index fund known as First Trust Dow Jones Internet Index Fund, which is managed by the First Trust ETF's portfolio advisor. The First Trust ETF will generally seek to hedge substantially all of its U.S. dollar currency exposure associated with its portfolio investments in respect of the hedged units back to the Canadian dollar.

Key Features of Underlying Fund

- The Internet is reaching further than ever before to connect our world, businesses and personal lives through what is known as the Internet of Things (IoT), or the billions of connected physical devices (cell phones, routers, wearables, home appliances, vehicles, to name just a few). We are now living in a universe of intelligent products, services and ways of conducting business that are increasing efficiency, while also uncovering a new era of economic growth.
- The Index is designed to measure the performance of the largest and most actively traded securities issued by U.S. companies in both the Internet Commerce and Internet Services industries.

Risk rating

First Trust Portfolios Canada has rated the volatility of this ETF as **medium to high**. This rating is based on how much the Underlying Fund returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the Risk Factors section of the ETF's prospectus.

Effective February 17, 2021, the First Trust ETF changed its investment objectives to replicate, to the extent possible, the performance of an index of U.S. companies involved in the internet industry, initially the Dow Jones Internet Composite IndexSM. The First Trust ETF provides exposure to its new index by investing all or substantially all of its assets in an underlying U.S. index fund known as First Trust Dow Jones Internet Index Fund, which is managed by the First Trust ETF's portfolio advisor. If this change had been effective throughout the performance measurement period the performance of the First Trust ETF should have more closely replicated performance of the index.

¹ As of December 31, 2023 audited annual financial statements and MRF.

² Distribution rate is calculated by dividing the most recent annualized distribution paid or declared by the Net Asset Value. Distribution rates may vary. The distributed amount may include return of capital (ROC) from time to time.

*The First Trust ETF's management fee will also bear the management fee of the underlying fund (i.e. First Trust Dow Jones Internet Index Fund).

First Trust Dow Jones Internet Index ETF

The First Trust ETF will obtain exposure to the Index by investing in the Underlying Fund, a US-listed index ETF which itself replicates or substantially replicates the Index.

The Dow Jones Internet Composite IndexSM is a float-adjusted market capitalization weighted index designed to represent the largest and most actively traded stocks of U.S. companies in the Internet industry.

To be eligible for the Dow Jones Internet Composite IndexSM, a stock must be listed on the NYSE, NYSE MKT or Nasdaq stock exchange and meet the following criteria:

- Generate a majority of sales/revenues from the Internet.
- Minimum trading history of three months.
- Minimum three-month average float-adjusted market capitalization of \$100 million.

Eligible stocks are ranked first by three-month average float-adjusted market capitalization and then by three-month average share volume. A final rank is calculated based on an equally weighted average of the market cap and volume rankings.

Companies are sorted by final rank and 40 companies are selected, consisting of 15 classified as Internet Commerce and 25 classified as Internet Services.

The index is weighted by float-adjusted market capitalization.

The weight of any individual security is restricted to 10% and the aggregate weight of individual securities with weights of 4.5% or more is restricted to 45%

The index is rebalanced quarterly.
