#### **Investment Objective and Strategy**

The fundamental investment objective of **First Trust AlphaDEX™ U.S. Technology Sector Index ETF** (the “First Trust ETF”) is to replicate, to the extent possible, the performance of the StrataQuant® Technology Index (“Index”), net of expenses.

The investment strategy of the First Trust ETF is to invest in and hold the constituent securities of the Index in the same proportion as they are reflected in the Index or securities intended to replicate the performance of such Index. The Index results from applying the AlphaDEX™ methodology to the Russell 1000® Index, a market index representing the large and mid-capitalization segment of the U.S. equity universe, and then selecting the constituent securities for the Index from those qualifying stocks included in the Technology Sector.

The Manager may use a sampling methodology in selecting investments for the First Trust ETF. As an alternative or in conjunction with investing in and holding constituent securities, the First Trust ETF may also invest in other securities to obtain exposure to the constituent securities of the applicable Index in a manner that is consistent with the investment objective and investment strategy of the First Trust ETF.

In this case, the First Trust ETF may also obtain exposure to the applicable Index by holding securities of a US-listed index ETF, First Trust Technology AlphaDEX® Fund (NYSE Arca ticker: FXL), of an affiliate of the Manager, which replicates or substantially replicates the applicable Index.

#### **Risk**

The risks associated with an investment in the First Trust ETF remain as discussed in the First Trust ETF’s most recent prospectus. There have been no significant changes during the reporting year that affected the overall level of risk associated with the First Trust ETF. The First Trust ETF provides exposure to the technology sector of the U.S. equity market in either a non-U.S. currency hedged and U.S. currency hedged manner.

#### **Results of Operations**

##### **General**

The First Trust ETF’s total net asset value as of December 31, 2025, was \$33,139,268 or \$109.37 per Unit (“FHQ”) and \$57.96 per Hedged Unit (“FHQ.F”). The First Trust ETF’s total net asset value as of December 31, 2024, was \$30,598,224 or \$101.41 per FHQ and \$52.45 per FHQ.F.

There were no cash distributions paid nor declared for the year ended December 31, 2025 by the First Trust ETF. However, the First Trust ETF made notional distributions of \$13.6200 per unit for FHQ and \$7.8400 per unit for FHQ.F for the year ended December 31, 2025. These amounts were reinvested in the First Trust ETF and not paid in cash to unitholders.

##### **Investment Performance**

For the year ended December 31, 2025, FHQ returned 7.85% compared to the Russell 1000® Technology Index total return of 21.56% while FHQ.F returned 10.52% compared to the Russell 1000® Technology Index (USD) total return of 27.49%. Unlike the indices, the First Trust ETF’s returns are net of fees and expenses.

As of December 31, 2025, the Technology sector accounted for 39.31% of the weight of the Russell 1000® Index. The Russell 1000® Technology Index outperformed the Russell 1000® Index, which returned 11.86%. The Russell 1000® Technology Index (USD) outperformed the Russell 1000® Index (USD), which returned 17.37%.

As of December 31, 2025, the portfolio held 99 equity securities. The top ten equity holdings accounted for 20.56% of the total NAV. The AlphaDEX™ stock selection process is a rules-based process and can result in industry weightings that differ from that of the indices.

The First Trust ETF underperformed the benchmark during the year due to stock selection, particularly within the Software and Computer Services sector. Notably, a large underweight position in Alphabet Inc. weighed on relative

performance. An overweight position in AppLovin Corporation relative to the benchmark, and an underweight position in Microsoft Corporation, partially offset the underperformance.

The U.S. dollar depreciated 4.65% against the Canadian dollar from December 31, 2024, to December 31, 2025. FHQ.F hedges its exposure to the U.S. dollar.

The First Trust ETF's top five stocks by contribution to return were Micron Technology, Inc., Palantir Technologies Inc., Western Digital Corporation, Amphenol Corporation, and Cloudflare, Inc. The First Trust ETF's bottom five stocks by contribution to return were Marvell Technology, Inc., Globant S.A., Pure Storage, Inc., ServiceNow, Inc., and Strategy Inc.

### **Recent Developments**

U.S. stocks finished the year near all-time highs, lifted by earnings growth and optimism surrounding the development of artificial intelligence. The Russell 1000® Index returned 17.37% during the year, including dividends. However, the U.S. dollar depreciated relative to the Canadian dollar, meaning the index gained 11.86% over the same year measured in Canadian dollars. The year marked a volatile year for U.S. stocks, with stocks recovering from a significant drawdown in the first half of the year that culminated in April when the U.S. announced sweeping tariffs on its trading partners. However, the market reversed as tariff tensions eased. The artificial-intelligence trade, or AI trade, and development of adjacent technologies also propelled the rebound in large-cap stocks. Speculative stocks, or unprofitable companies, easily outperformed profitable companies, underscoring the market's optimism regarding AI's potential. The U.S. Federal Reserve cut interest rates three times during the year, citing a softening labor market, which also provided a tailwind for U.S. stocks. Overall, the Russell 1000® Index finished the year trading at a 25.2 P/E multiple with a 1.15% dividend yield, more expensive than where it stood at the end of 2024.

Portfolio turnover rate <sup>(3)</sup>	113.64%	108.17%	112.57%	122.39%	159.79%

(1) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated year and is expressed as an annualized percentage of daily average net asset value during the year.

(2) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the year.

(3) The First Trust ETF's portfolio turnover rate indicates how actively the First Trust ETF's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the First Trust ETF buying and selling all of the securities in its portfolio once in the course of the year. The higher a First Trust ETF's portfolio turnover rate in a year, the greater the trading cost payable by the First Trust ETF in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between high turnover rate and the performance of a First Trust ETF.

**Management Fees**

The First Trust ETF will pay the Manager a management fee of 0.70% based on the average daily NAV of the First Trust ETF. The management fee, plus applicable taxes including HST, will be accrued daily and paid monthly in arrears. The Manager may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.
