Forward-looking Statements

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent beliefs regarding future events. By their nature, forward-looking statements are based on assumptions and are subject to inherent risks and uncertainties. There is significant risk that forward-looking statements will not prove to be accurate. Readers of this document should not place undue reliance on forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the expectations, estimates or intentions expressed or implied in the forward-looking statements. These factors include but are not limited to market and general economic conditions, interest rates, foreign currency exchange rates, the extent of industry sector exposure, the performance of the securities of the issuers held in the portfolio and regulatory developments and the risks detailed in the First Trust ETF's prospectus. The Manager does not undertake and specifically disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Investment Objective and Strategy

The fundamental investment objective of **First Trust Morningstar Dividend Leaders ETF (CAD-Hedged)** (the "First Trust ETF") is to replicate, to the extent possible, the performance of an index of U.S. companies that have shown dividend consistency and dividend sustainability, initially the Morningstar® Dividend Leaders IndexSM.

The Morningstar® Dividend Leaders IndexSM consist of stocks listed on one of the three major exchanges, NYSE, NYSE Amex or Nasdaq, that have shown dividend consistency and dividend sustainability. Real Estate Investment Trusts (REITs) are not included.

Risk

In February 2021, the First Trust Dorsey Wright U.S. Sector Rotation Index ETF (CAD-Hedged) changed its investment objectives (see Investment Objective and Strategy) and its name to the First Trust ETF. The First Trust ETF provides exposure to its new index by investing all or substantially all of its assets in an underlying U.S. index fund known as First Trust Morningstar Dividend Leaders Index Fund (the "Underlying Fund"), which is managed by the First Trust ETF's portfolio advisor. The effective date of change is February 12, 2021.

The risks associated with an investment in the First Trust ETF is discussed in the First Trust ETF's most recent prospectus.

Results of Operations

General

The First Trust ETF's net asset value as of June 30, 2021 was \$2,856,346 or \$28.56 per unit. The First Trust ETF's net asset value as of December 31, 2020 was \$2,443,172 or \$24.43 per unit.

For the period ended June 30, 2021, the First Trust ETF paid total cash distributions per unit of \$0.768. In addition, the First Trust ETF declared cash distributions per unit of \$0.2200 for record date of June 30, 2021 with payment date of July 8, 2021.

Investment Performance

For the six-month period ended June 30, 2021, the First Trust ETF returned 18.74% compared to the S&P 500 Index (CAD-Hedged) (the "benchmark") return of 15.27%. Unlike the benchmark, the First Trust ETF's return is net of fees and expenses.

The First Trust ETF outperformed the benchmark S&P 500 CAD Hedged Index during the period due to stock selection prior to the conversion. Prior to the change, the First Trust ETF owned other sector specific ETFs that outperformed their corresponding sectors in the benchmark due to strong stock selection. After the change, the First Trust ETF slightly underperformed on poor stock selection in Communication Services but mitigated minor underperformance through strong selection in Consumer Staples.

The First Trust ETF's only holding, the Underlying Fund, held 100 equity securities as of June 30, 2021. The top ten equity holdings for the Underlying Fund accounted for 59.47% of the portfolio within the Underlying Fund.

The Underlying Fund's top five stocks by contribution to return were Philip Morris International Inc., Altria Group Inc, International Business Machines Corporation, ViacomCBS Inc. Class B, and Citigroup Inc. The bottom five stocks by contribution to return were Verizon Communications Inc., Edison International, Dominion Energy Inc, Southern Company, and Sempra Energy.

Recent Developments

In February 2021, the First Trust Dorsey Wright U.S. Sector Rotation Index ETF (CAD-Hedged) changed its investment objectives to seek to replicate, to the extent possible, the performance of an index of U.S. companies that have shown dividend consistency and dividend sustainability, the Morningstar® Dividend Leaders IndexSM. The Russell 1000® Index gained 14.95% in the first half of 2021, including dividends, closing the period at a record high

as the U.S. economy continued to recover from the COVID-19 pandemic. However, the U.S dollar depreciated relative to the Canadian dollar, meaning the index gained 11.71% over the same period measured in Canadian dollars. During the period, the COVID-19 vaccine became widely available in the U.S., which led to relaxed business restrictions and increased economic activity. Notably, the unemployment rate improved to 5.9% in June from 6.7% in December 2020 and 14.8% at the height of the pandemic, while consumer spending exceeded pre-pandemic levels during the period. However, increased demand for goods and services combined with labor and materials shortages produced a surge in inflation during the period. In June, the Consumer Price Index increased 5.4% compared to the prior year, which was the highest yearly increase since August 2008. The economic reopening benefitted cyclical stocks like energy and financial companies, which were the two best performing sectors during the period. Conversely, defensive stocks like utilities and consumer staples were the two worst performing sectors during the period. The Russell 1000® Index finished the period trading at a 31.8 P/E multiple with a 1.29% dividend yield, compared to 32.1 and 1.50%, respectively, at the end of 2020.

⁽¹⁾ Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period/year, including the First Trust ETF's proportionate share of the MER of any underlying fund in which the First Trust ETF has invested, and is expressed as an annualized percentage of daily average net asset value during the period/year.

⁽b) Seed capital

⁽¹⁾ This information is provided as at June 30, 2021 and December 31 of the period/years shown and is prepared under IFRS.

⁽²⁾ Net asset value and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the period/year.

⁽³⁾ Distributions were paid in cash or reinvested in additional units of the First Trust ETF, or both. Non-cash distributions are reinvested in additional units of the First Trust ETF and subsequently consolidated. Neither the number of units held by the unitholder, nor the net asset per unit of the First Trust ETF change as a result of any non-cash distributions.

⁽⁴⁾ This table is not intended to be a reconciliation of beginning to ending net asset value per unit.

⁽²⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period/year. This includes the First Trust ETF's proportionate share of the commissions of any underlying fund in which the First Trust ETF has invested.

⁽³⁾ The First Trust ETF's portfolio turnover rate indicates how actively the First Trust ETF's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the First Trust ETF buying and selling all of the securities in its portfolio once in the course of the period/year. The higher a First Trust ETF's portfolio turnover rate in a period/year, the greater the trading cost payable by the First Trust ETF in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between high turnover rate and the performance of a First Trust ETF.

Management Fees

The First Trust ETF will pay the Manager a management fee of 0.15% based on the average daily NAV of the First Trust ETF. The management fee, plus applicable taxes including HST, will be accrued daily and paid monthly in arrears. The Manager may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.

The First Trust ETF will bear the Underlying Fund's management fee of 0.30% per annum on average daily net assets on the First Trust ETF's portfolio assets invested in the Underlying Fund. Accordingly, the management fee cost to unitholders of their investment will be 0.45% per annum of NAV of the First Trust ETF plus applicable taxes.

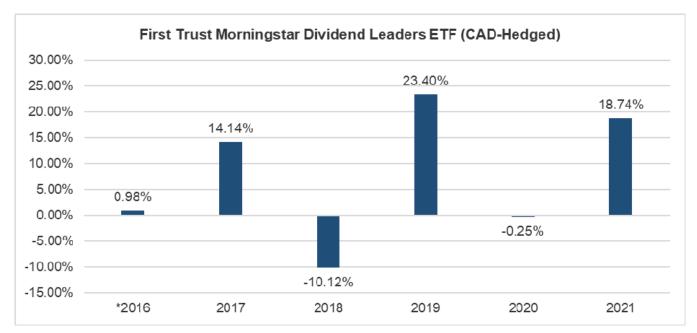

Past Performance

General

The past performance information shown assumes that all distributions made by the First Trust ETF in the period/years shown were reinvested in additional securities of the First Trust ETF. The performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the First Trust ETF has performed in the past does not necessarily indicate how it will perform in the future.

Year by Year Returns

The bar chart below shows the First Trust ETF's performance for the six-month period ended June 30, 2021, for the years ended December 31, and for the period from commencement of operations to December 31, 2016 and illustrates how the investment fund's performance has changed from year to year. The chart also shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year.
